

Rewrite 事例:

```
SELECT *  
FROM T1  
WHERE T1.name IN (SELECT name  
                  FROM T2 WHERE T2.age IN (SELECT age  
                                          FROM T3))
```

AND T1.id < 10;

重写结果:

```
SELECT *  
FROM T1 LEFT SEMI JOIN (SELECT name  
                        FROM T2 LEFT SEMI JOIN (SELECT age FROM T3) $a$1($c$1)  
                        ON T2.age = $a$1.$c$1 ) $a$1($c$1)  
ON T1.name = $a$1.$c$1  
WHERE TRUE and T1.id < 10;
```

AnalysisResult 需要  
重写的条件:  
1 包含子查询  
2 不是createViewStmt  
3 不是AlertViewStmt

StmtRewriter.java  
支持 subQuery 的语句:  
1 QueryStmt  
2 InsertStmt  
3 CreateTableAsSelectStmt
